FORWARD-LOOKING STATEMENTS

This document contains statements that may constitute “forward-looking statements” within the meaning of Federal securities laws. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors concerning the Company’s operations and business environment. Important factors that could cause actual results to differ materially from those suggested by these forward-looking statements and that could adversely affect the Company’s future financial performance include the following: the pace and nature of new product introductions by the Company and the Company’s customers; the Company’s ability to successfully implement its strategy to create sustainable, long-term shareholder value; the Company’s ability to successfully implement its growth strategies; the outcome of the Company’s various productivity-improvement and cost-reduction efforts; the effectiveness of the Company’s past restructuring activities; changes in costs or availability of raw materials, including energy; industry and economic factors related to the Company’s domestic and international business; growth in markets for products in which the Company competes; industry and customer acceptance of price increases; actions by competitors, including increased intensity of competition; the loss of any customers in certain product lines in which our sales are made to a relatively small number of customers; product liability claims or product recalls; the costs of compliance, or failure to comply, with laws and regulations applicable to our industries and markets; changing consumer preferences and changing technologies; currency exchange rate fluctuations; estimates related to the Tax Cuts and Jobs Act and its effects on our results; and failure to complete and integrate future acquisitions or dispositions. The risks and uncertainties identified above are not the only risks the Company faces. Additional risks and uncertainties not presently known to the Company or that it currently believes to be immaterial also may adversely affect the Company. Should any known or unknown risks and uncertainties develop into actual events, these developments could have material adverse effects on our business, financial condition and results of operations. This document contains time-sensitive information that reflects management’s best analysis only as of the date of this document. Except to the extent required by applicable laws, the Company does not undertake to publicly update or revise its forward-looking statements even if experience or future changes make it clear that any projected results expressed or implied herein will not be realized. Additional information regarding these risks can be found in our most recent Annual Report on Form 10-K and subsequent reports that we file with the SEC.

NON-GAAP FINANCIAL MEASURES

Within this document, the Company reports certain non-GAAP financial measures, including: (1) adjusted operating profit and adjusted diluted EPS from continuing operations (which exclude restructuring and other costs as well as the impact of the Tax Cuts and Jobs Act (“2017 Tax Legislation”)) and (2) percentage changes in adjusted revenue, adjusted operating income, and adjusted diluted EPS on a local currency basis (which eliminate the effects that result from translating its international operations into U.S. dollars). The Company has included each of these non-GAAP measures in order to provide additional information regarding our underlying operating results and comparable year-over-year performance. Such information is supplemental to information presented in accordance with GAAP and is not intended to represent a presentation in accordance with GAAP. These non-GAAP measures should not be considered in isolation. Rather, they should be considered together with GAAP measures and the rest of the information included in this report. Management internally reviews each of these non-GAAP measures to evaluate performance on a comparative period to-period basis and to gain additional insight into underlying operating and performance trends. The Company believes this information can be beneficial to investors for these same purposes. These non-GAAP measures may not be comparable to similarly titled measures used by other companies. Additional information related to the Company’s use of non-GAAP financial measures and the restructuring and other costs as well as the impacts from the 2017 Tax Legislation on our 2017 results that have been excluded from the non-GAAP financial measures in 2018 and 2017 and reconciliations of non-GAAP financial measures to the most comparable GAAP financial measures are available at sensient.com.
